

BRIGHT TV

**DRIVING SUBSCRIPTION GROWTH
THROUGH CONTENT STRATEGY**

By Nomvelo Radebe

BRIGHT TV

AGENDA

1. Viewer Demographics
2. Viewer insights
3. Key Business issues
4. Recommendations

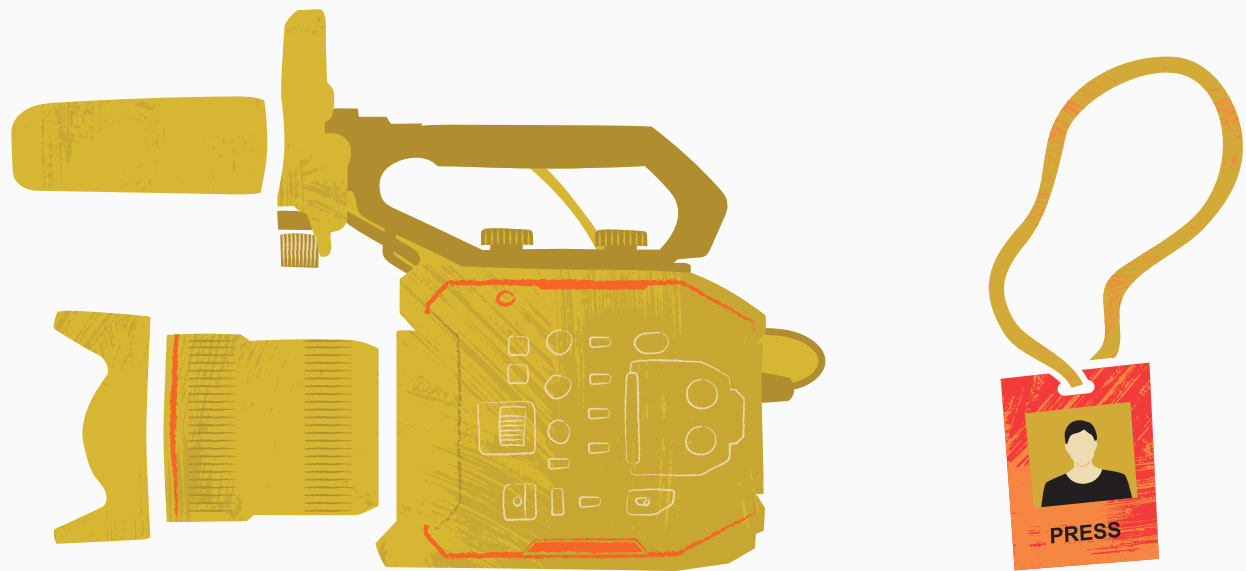

EXECUTIVE SUMMARY

Important Findings:

- 93% of viewing is brief.
- The most engaging content is sports-related.
- Music stations do well, but they don't retain viewers.
- Viewer stickiness is a problem for entertainment channels.

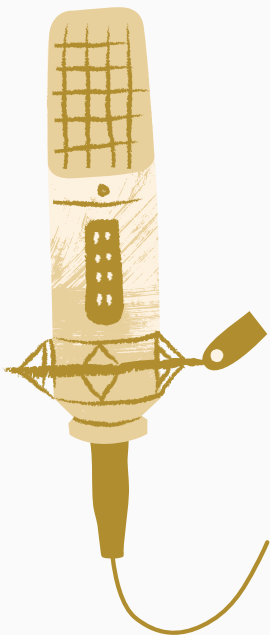

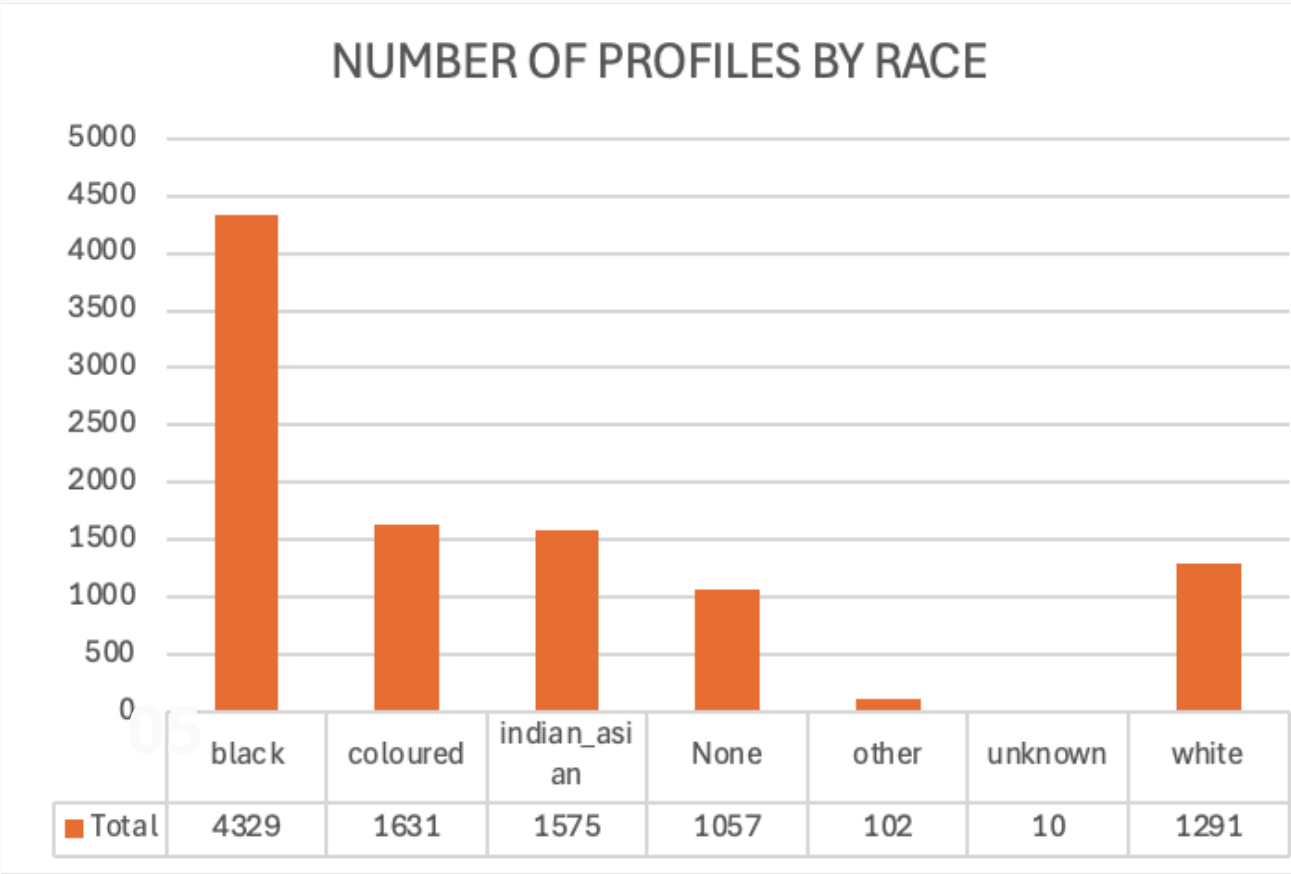

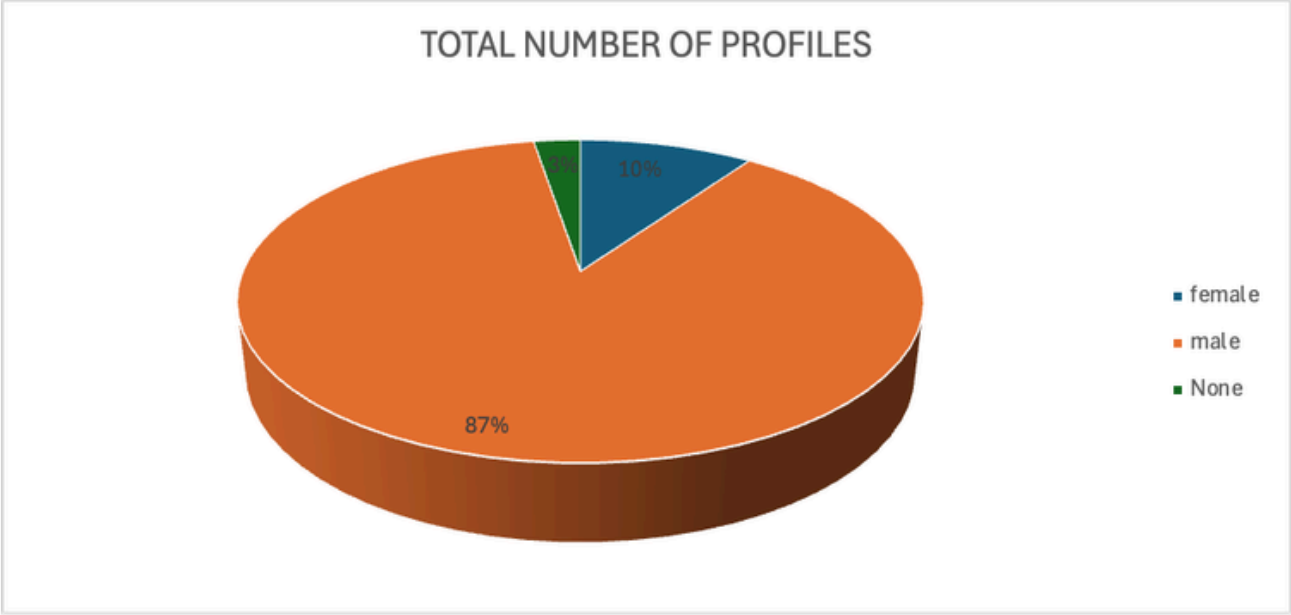

BRIGHT TV

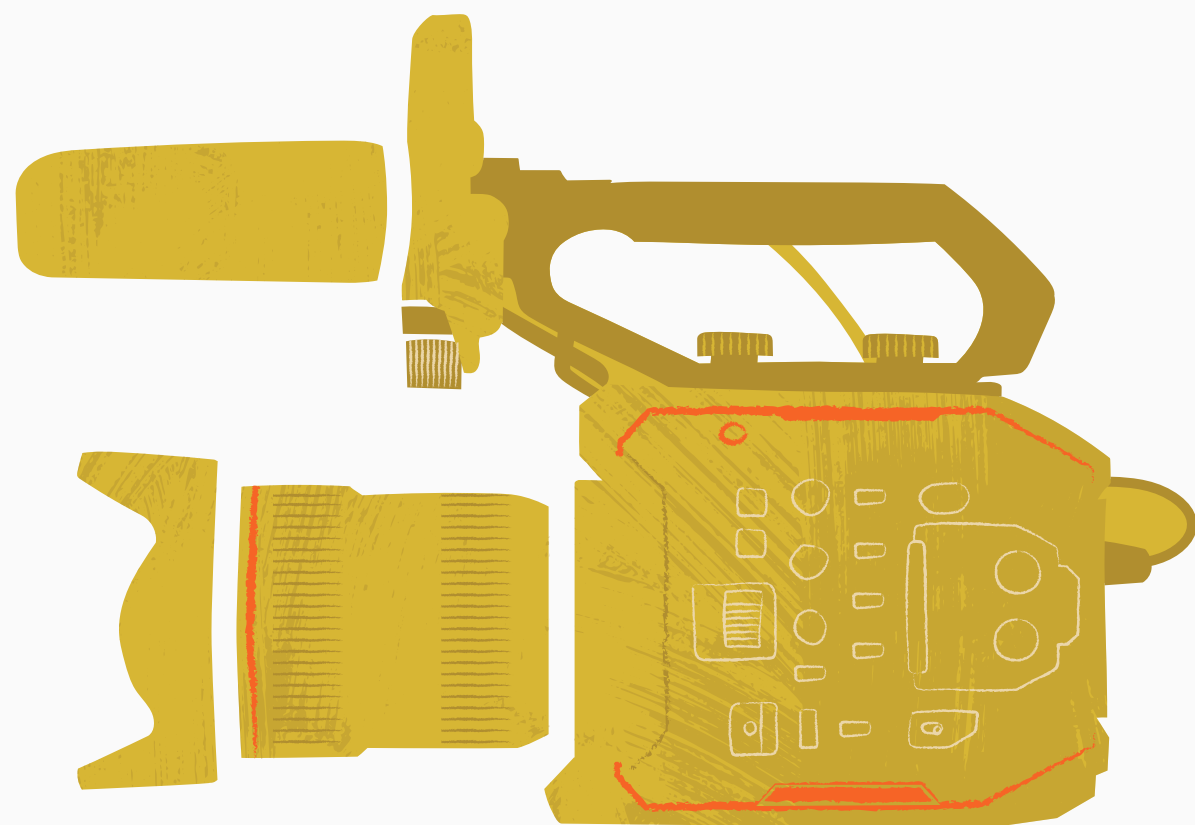

VIEWER DEMOGRAPHICS

- Less than 10% of all profiles are female, with men making up the majority at 87.6% and indeterminate gender at 2.6%.
- Black- 4,329 (~43.3%)—This is BrightTV's biggest and most significant audience segment.
- 1,631 (~16.3%) were colored.
- Asian/Indian: 1,575 (~15.8%)
- White: 1,291 (~12.9%)
- None: 1,057 (~10.6%)

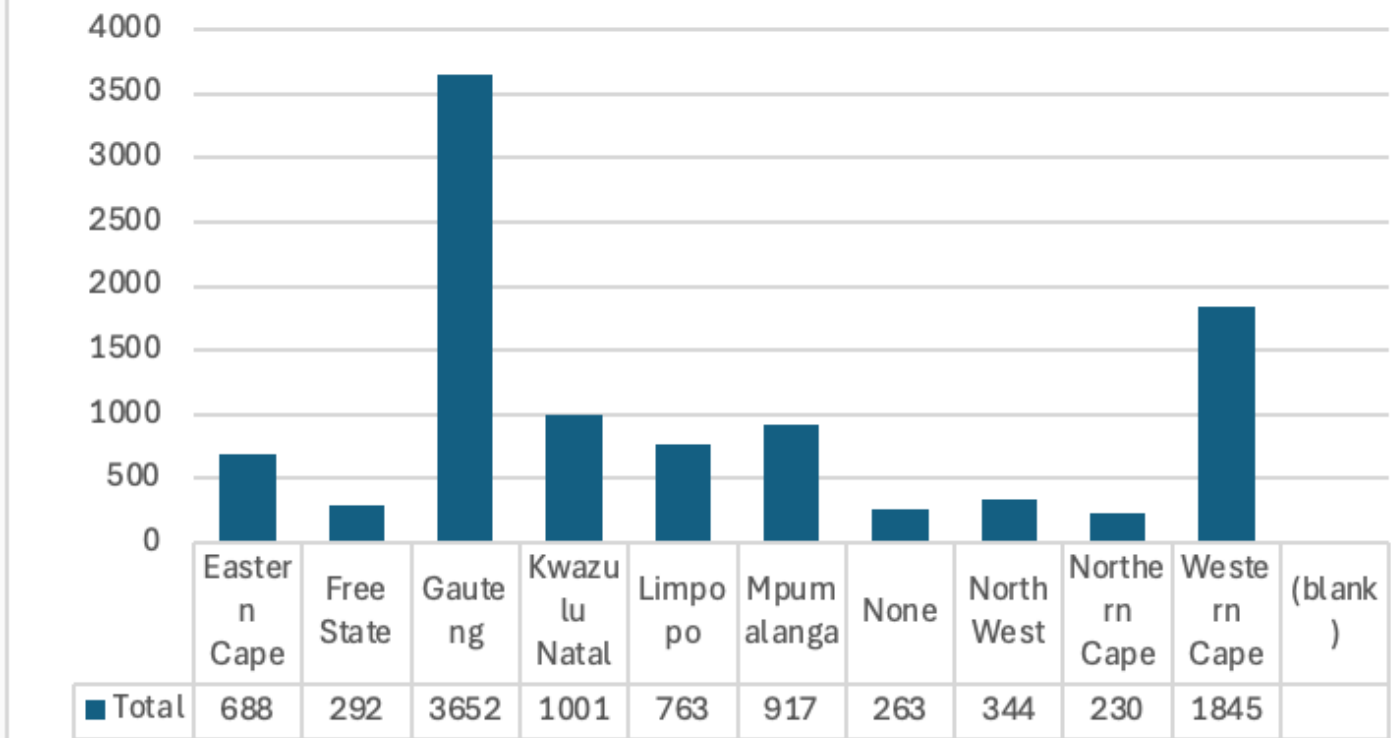

BRIGHT TV

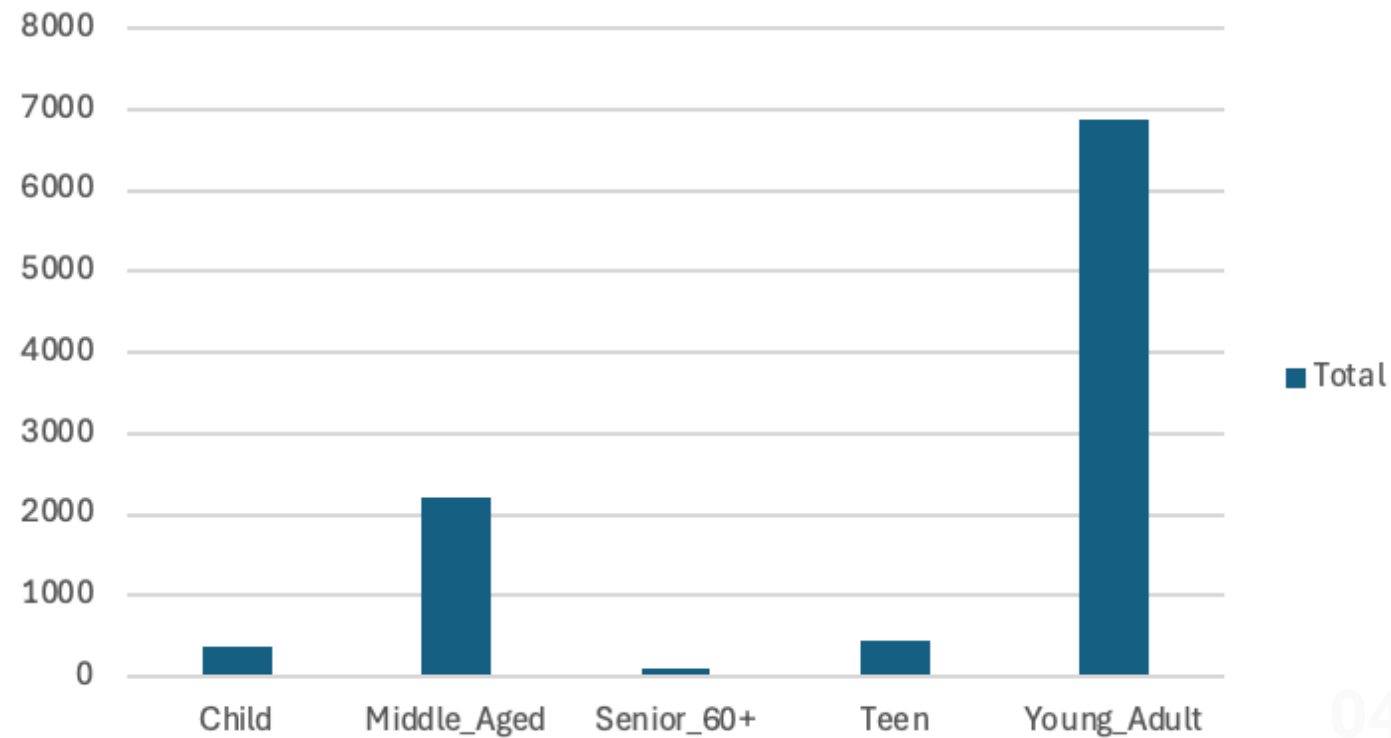

Core audience profile:

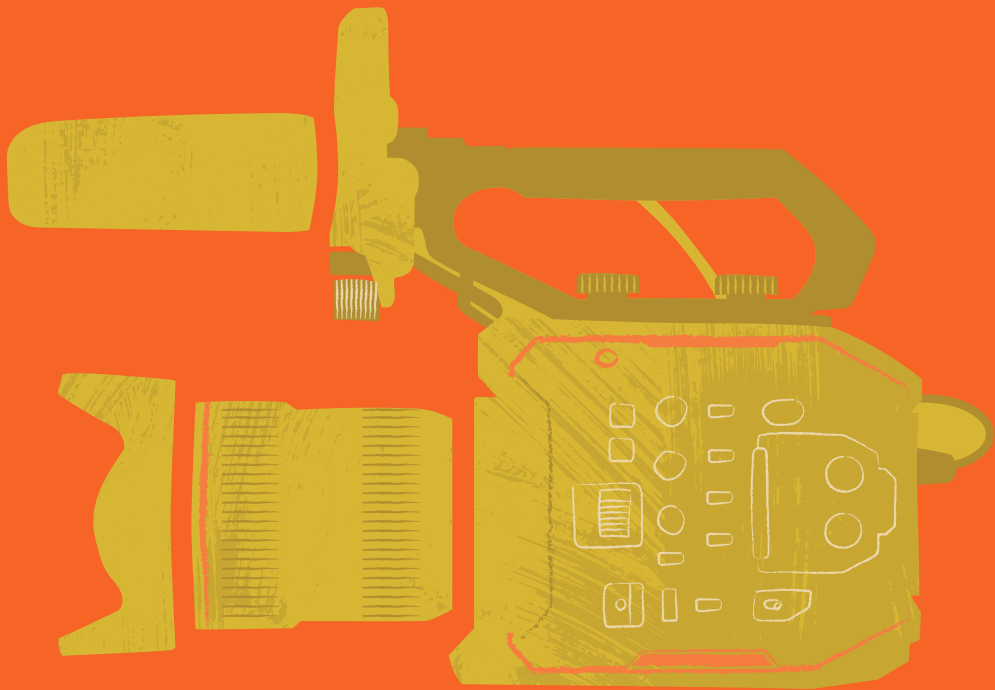

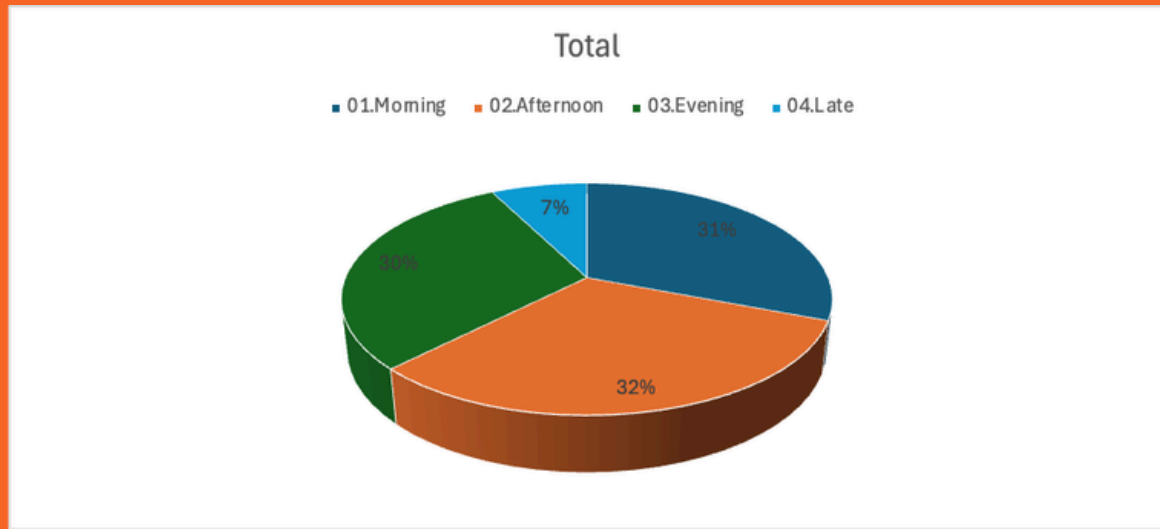

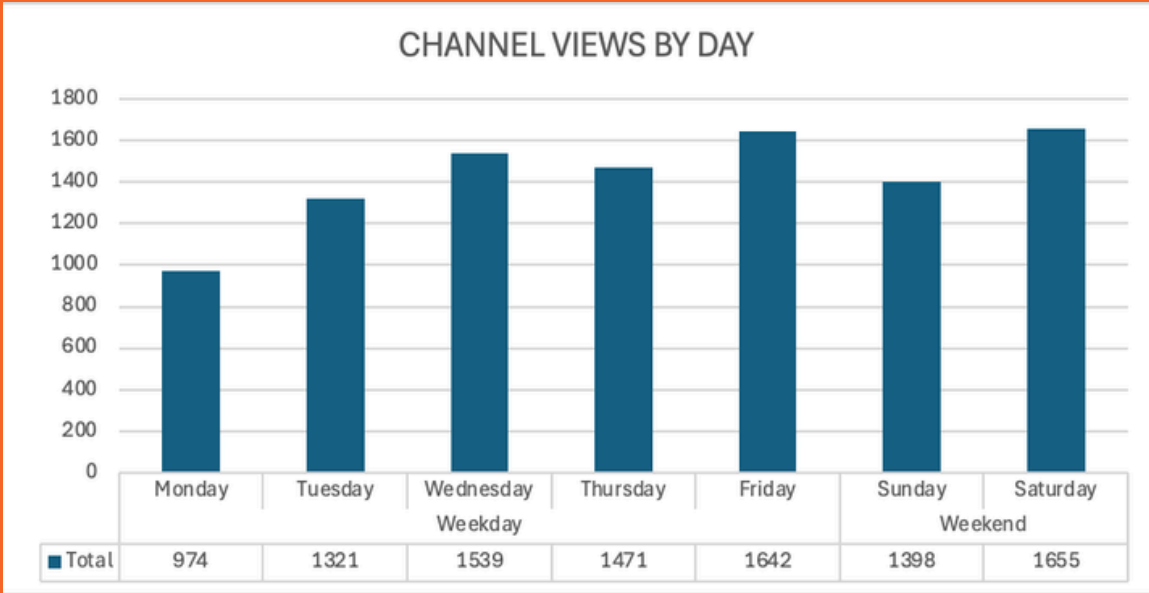

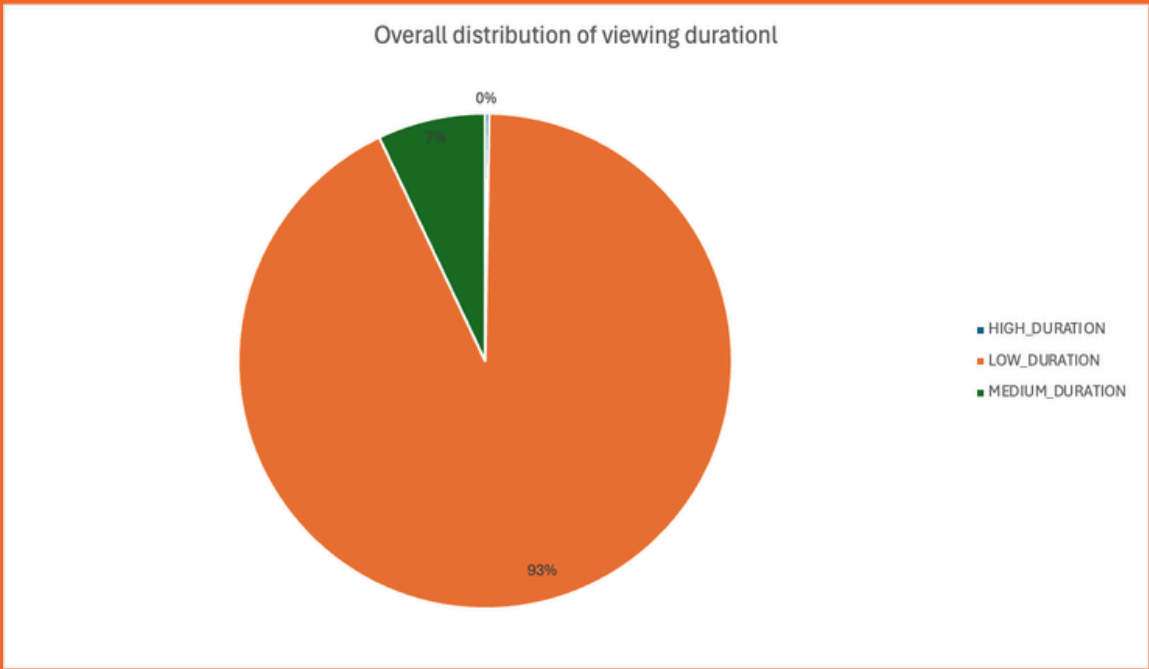

- Despite a young, primarily male, and ethnically varied audience, there is still a strong potential for growth, they are not staying long enough to provide value.
- The largest market by is Gauteng, dominating at 36.5%. The Western Cape comes second with 18.5% and KZN showing mid tier performance at 10%.

NUMBER OF PROFILES BY LOCATION

PROFILES BY AGE GROUP

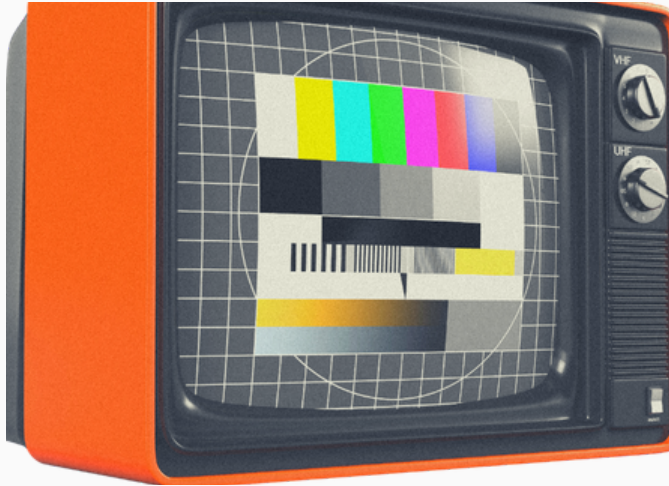

BRIGHT TV

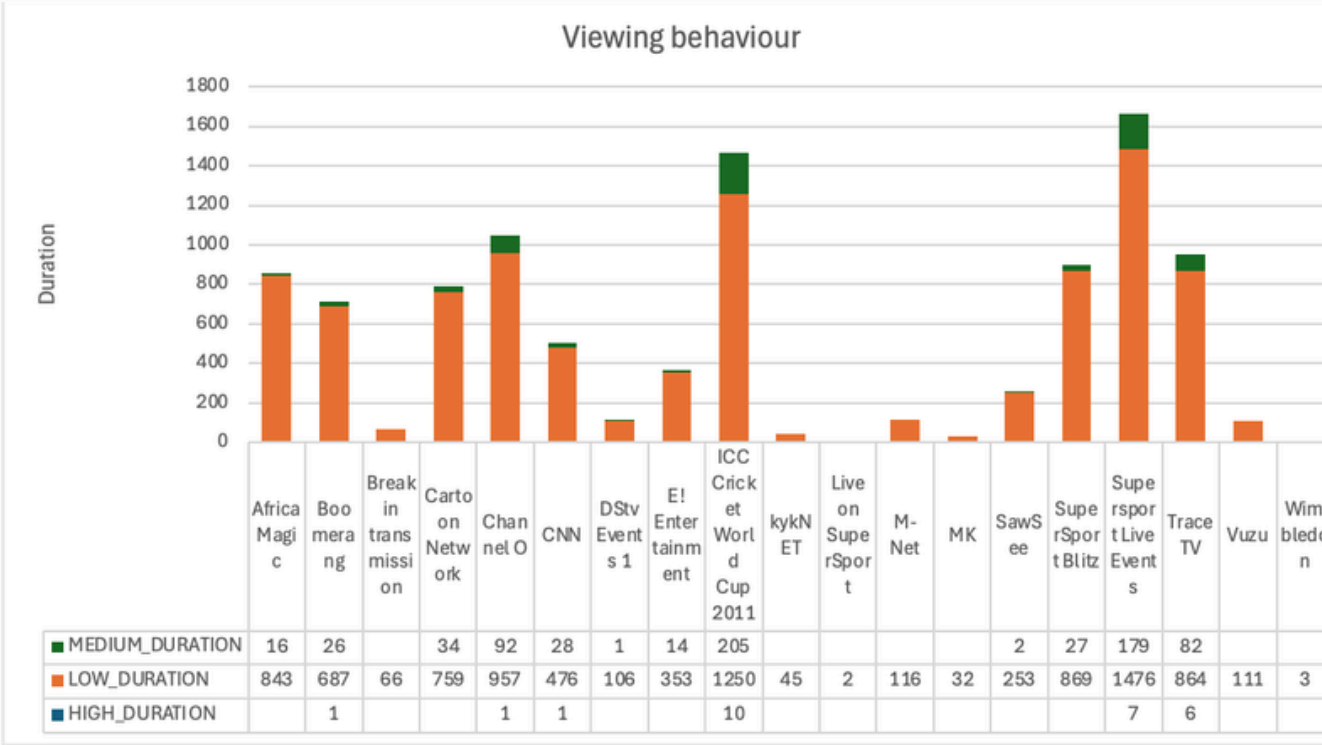

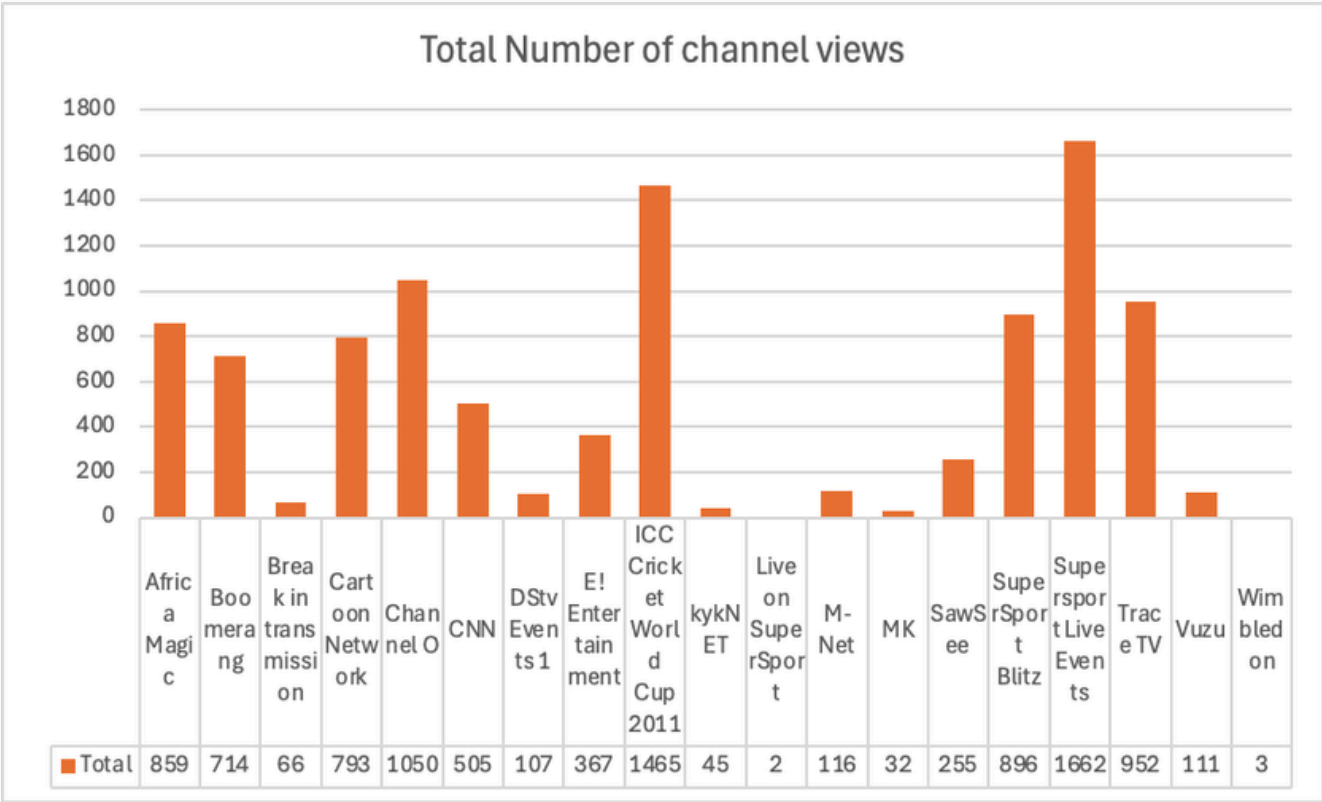

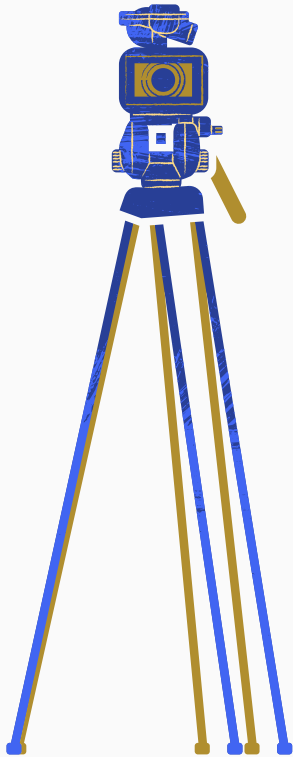

VIEWER INSIGHTS

- User activity is evenly dispersed throughout the morning, afternoon, and evening, with a modest surge in the afternoon. Late-night activity is low.
- User involvement is highest during organized weekday routines, with a peak around Friday and Saturday.
- While the site has effectively attracted users (10,000 total views), more than 90% of sessions are brief, showing a significant gap in content engagement and retention.

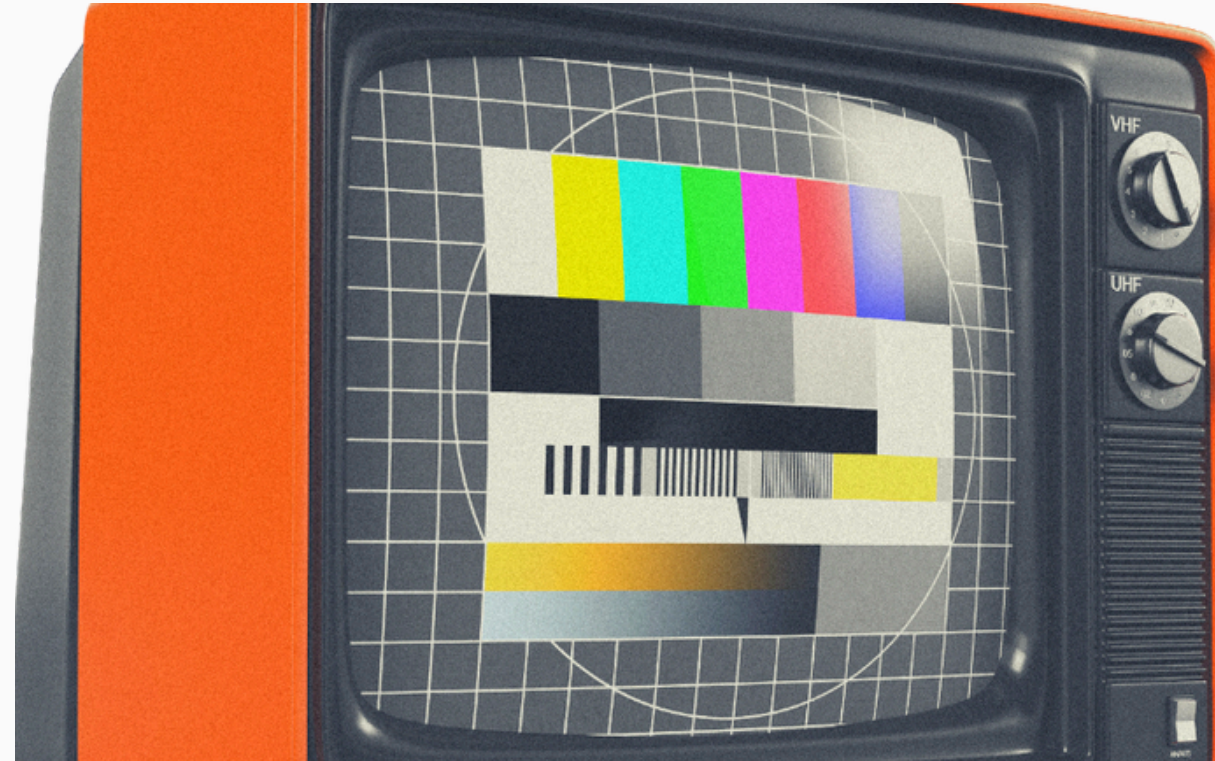

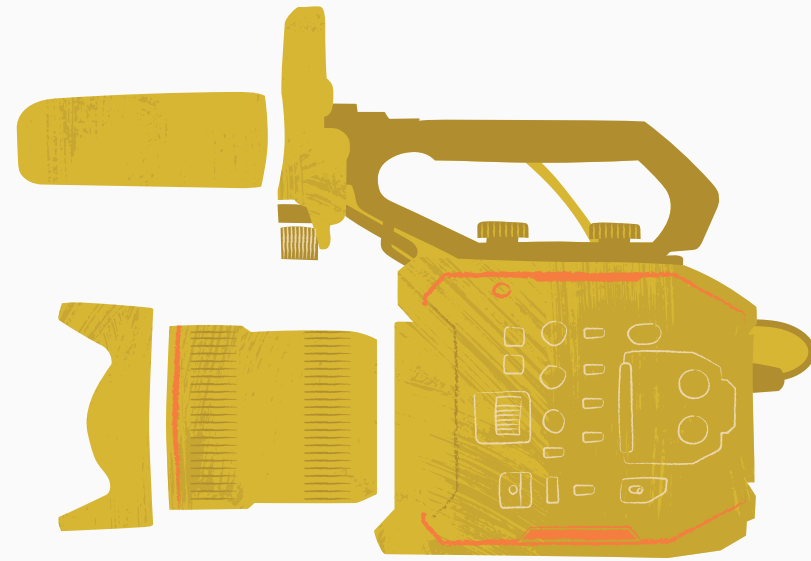

VIEWER INSIGHTS

- The platform is extremely effective at attracting viewers to live sports and entertainment content, especially during peak weekday hours. However, interaction depth remains critically low, demonstrating that while material entices people, it fails to keep them.
- While high-performing channels like live sports and music effectively attract viewers, more than 90% of all viewing sessions are brief, with essentially no high-duration engagement on any channel. This demonstrates a key retention gap, in which content draws viewers in but fails to hold their attention.
- You do not have a content problem; rather, you have a content experience problem.
- Fixing how people discover, start, and continue viewing would provide considerably more value than simply adding new channels.

KEY BUSINESS PROBLEMS

BRIGHT TV

Core Issues

- **Retention Failure-92% of views have a short duration.**
- **Content Stickiness Gap-No long-term domination in any channel.**
- **Early Drop-Off Behavior-Users disengage rapidly after starting material**
- **Technical issues- Data collection has unknown values**

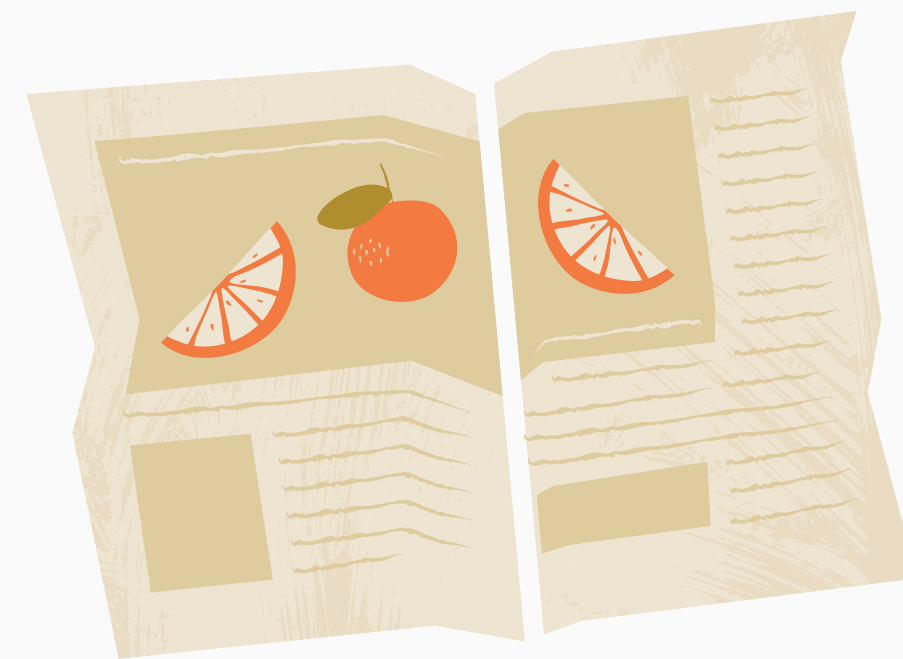

RECCOMENDATIONS

- The immediate strategic priority should change from acquisition to retention, focusing on boosting content stickiness and increasing watching time.
- The most productive plan is to concentrate on weekday afternoons and early evenings, leaving weekends for entertainment-related activities and avoiding low-return periods such as late nights and Mondays.
- Marketing and content efforts should be focused on the midday and early evening hours for maximum impact.
- The strategy focus should shift to leveraging high-performing channels (sports, music) while improving content stickiness and platform reliability.

BRIGHT TV

RECCOMENDATIONS

- **Materials**

Boost hooks and intros

Give priority to episodic and short-form content

- **Product**

"Continue watching" features that autoplay the next content

- **Promotion**

Concentrate on:

Weekdays (peak afternoon)

Saturday plus Friday

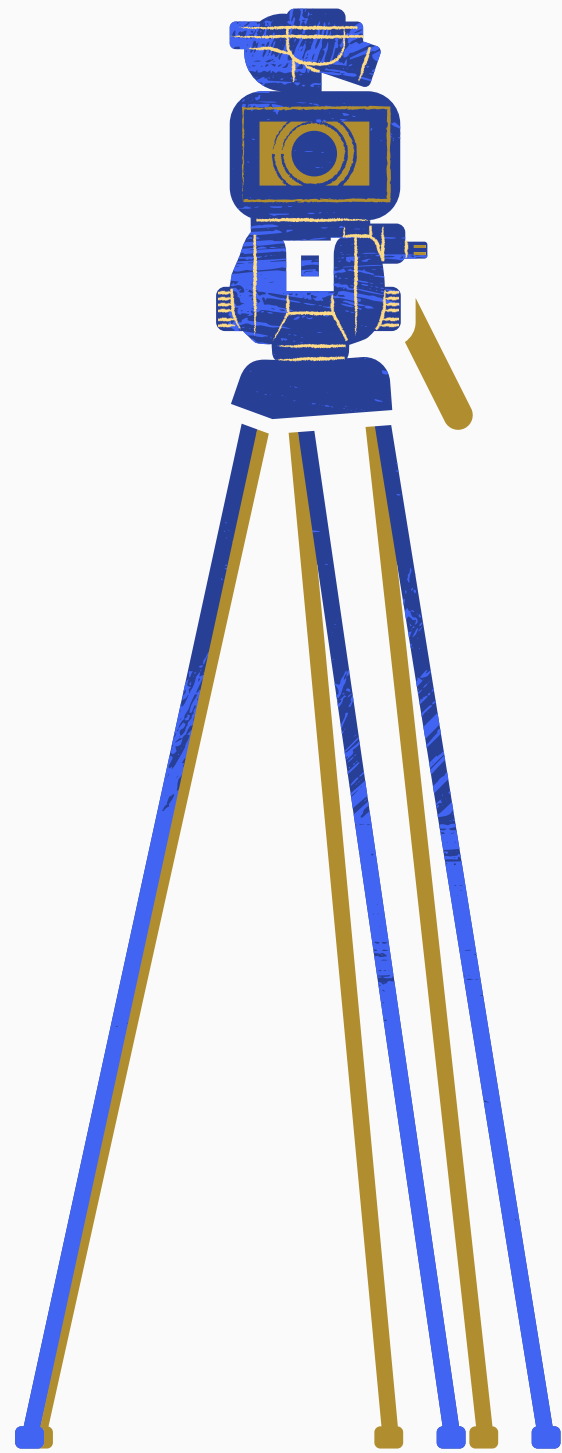

- **Ops & Data**

Resolve null province data

Fix the transmission problems

THANK YOU BRIGHT TV
